FASTCHARGING ON-THE-GO

JOIN THE  
TRANSITION  
TO E-MOBILITY

WITH 100% GREEN  
FASTCHARGING  
ON-THE-GO

# First EV fastcharging network powered by renewables, battery storage, 100% grid integrated

Atlante is NHOA Group's Global Business Line that offers innovative solutions to accelerate the transition towards sustainable mobility, by developing 100% green public charging stations for electric vehicles (EVs).

With a strategy oriented towards innovation, digitalization and environmental sustainability, Atlante leverages its unique technology, combining renewable energy, battery storage and vehicle-to-grid integration services to offer EV-drivers competitively priced zero-emission energy and provide them with the best on-the-go charging experience.

Its modular technical solutions make Atlante the strategic partner for municipalities and companies.

## **100% green energy for all kinds of site**

for drivers to use tailor-made solutions to play an active role in the creation of a more sustainable energy ecosystem

## **Cutting-edge fastchargers**

for on-the-go fastcharging at an output of up to 300kW

## **Solar Canopies**

to produce 100% local renewable energy and shelter customers from the weather

## **Energy Storage**

to have a sustainable impact on the European power grid

## **Vehicle-Grid-Integration**

to make electric vehicles a distributed energy resource to balance the power grid and future-proof our network

Atlante is an open network, welcoming all  
brands and models of electric vehicles

# We are facilitating the adoption of electric vehicles in Southern Europe

## Our Targets

Italy | France | Spain | Portugal

2025

5,000 fastcharging points

2030

35,000 fastcharging points

## Connecting Europe Facility (CEF)

Atlante's strategy is perfectly timed in terms of the adoption of the Fit for 55 package, the main aim of which is 100% zero-emission car registrations by 2035. In September 2022, Atlante has been selected for a €22.7 million grant support by the European Union under CEF Transport for the overall installation of 215 charging stations, for more than 1,400 fastcharging points for electric vehicles

# We benefit from the support of key stakeholders

**NHOA** is the promoter of and founding investor in Atlante. NHOA is both a pioneer and a global leader in the integration of renewables, storage and electric vehicles with the grid, having developed multiple microgrids as well as the world's largest Vehicle-to-Grid project (in Turin, in partnership with Stellantis).

**STELLANTIS** established as a result of the merger between the FCA and PSA Groups, is one of the top five carmakers globally, and leads the European market. Having announced the launch of 21 new BEV and PHEV models, Stellantis has selected Atlante as the preferred on-the-go charging network for its customers.

## NHOA operates the largest V2G hub in the world (Stellantis Drosso, Italy)

V2G technology enables vehicles to exchange energy with the power grid, making them a valuable resource for the national power grid and contributing to a more sustainable power system.

**Free2move eSolutions**, the e-Mobility joint venture between Stellantis and NHOA, is the preferred turnkey technology provider for Atlante network. It is developing exclusive and new cutting-edge fastchargers for 2023.

# OUR UNIQUE, COMPREHENSIVE OFFER

## eStation

Atlante's unique eStation combines a seamless fastcharging experience with on-site solar panels, energy storage and Vehicle-Grid-Integration features. Atlante is developing eStations that can fastcharge 8 or more electric vehicles, including modular and scalable options.

eStations feature state of the art chargers, developed ad hoc to Atlante's exacting standards

## easyStation

easyStations can be delivered in few weeks and are suitable for the vast majority of existing parking lots open to the public. For its easyStations, Atlante selects only the most reliable fastchargers, which are then integrated into Atlante's cloud-based platforms to ensure the best possible charging experience.

# Become our partner

Join Atlante and increase the appeal and revenues from your site, by equipping it with infrastructure for public use. Provide new services for EV drivers and increase visibility via EV charging apps. The quick turnaround at the chargers maximizes customer numbers and improves customer footfall at your site.

Atlante will manage the project end-to-end, bearing in mind the specific requirements and features of your sites, and will cover the entire economic investment.

CONTACT US

## Our added-value proposition

**Benefit from a turnkey solution free of charge**

**Optimize your Brand's Sustainability indicators**

**Improve your visibility with Atlante services**

**Real-time remote maintenance via the Atlante digital platform**

**Receive 24/7 customer support**

**Increase the economic value of your site**

## Configurations from 2 to 16 parking slots

S — M — L — XL

## Our easyStation

### Ultrafast

Powerful charging stations, from 30 to 300kW per charging point, for shorter charging sessions

### Suitable for all EV models

Wide range of configurations and functionalities, for optimal charging of all current and upcoming EV models

### Driver-friendly experience

Full interoperability with multiple e-mobility Apps and payment options

### Easy access

Designed for people's use, with the broadest range of capabilities

## Our experts will offer you the best technology for your site

**Short charging period ( $\leq 30$  mins):**  
on-the-go charging, to save time

**Use cases:**  
busy roads, cafés

**Output per charging point:**  
75-300kW

**Longer charging period (60-90 mins):**  
charge and do your shopping or enjoy leisure services

**Use cases:**  
stores, shopping malls, restaurants

**Output per charging point:**  
30-60kW

# Our eStation

Atlante's next-generation charging eStation relies on unique technical features and is fully integrated into local microgrids, with storage solutions and renewable energy sources. It optimizes charging costs and

vehicle-to-grid integration services, while offering the best charging experience.

User-centered Charging Experience

# Reliability, transparency and technical expertise

Atlante manages all the steps of the charging experience paying attention to the end customer and fully mastering all the technical aspects. Atlante is exclusively focused on the satisfaction of zero-emission travelers and is entirely dedicated to the spreading of electric mobility.

## Value proposition

### Ensure accessibility and visibility

End users can locate our stations and access our charging services via all the main e-mobility apps

### Ensure operability

We manage the complex technology using real-time monitoring, 24/7 assistance and constant energy management

### Give value to local communities

We invest in premium infrastructures of public utility and promote your site and nearby activities
